RELIABILITY AND COST-EFFECTIVENESS

The 55,000-page toner volume (at 6% coverage) and drum, designed to support the entire system life cycle (up to 3.6 million pages for the d-Copia 6200 and 4.8 million pages for the d-Copia 8200), guarantee ultra-reliable and **continuous document production**. The **long-life consumables** significantly reduce routine maintenance for the replacement of finished supplies, enabling departments with high output to **optimise running costs** (the lowest for this class of copier).

ERGONOMICS

These models make paper in black, the copiers make **paper changes** easy with their smooth-running paper trays, secure locks and robust handles. They feature **touch-screens** for simple, efficient management of all the optional print and scan functions, and feature a new-look black body design. In operation, the systems guarantee the essential requirements of confidentiality and hard disk data protection with a series of **security solutions** including cryptography and password-based access. An optional Data Security kit further raises security levels for sensitive data.

MODULARITY

The Olivetti d-Copia 6200 and d-Copia 8200 are fully modular digital copiers, **configurable for use in network** environments. Basic functions can be expanded with the addition of network printer and scanner modules, as well as **complete professional finisher options**. For enhanced paper autonomy, a large-capacity paper tray is available.

PRODUCTIVITY

The systems offer **competitive speeds** of 62 and 82 cpm respectively, rapid warm-up time (less than 30 seconds) and a **high-productivity duty cycle** of up to 500,000 pages per month with consistently **excellent reproduction levels**. Due to these models double scanner, the 260-page **automatic document feed** reads both sides of a page in a single pass, at a maximum speed of 110 opm at 300 dpi.

PAPER MANAGEMENT

The standard configuration comes with **sizeable paper capacity** of two 500-sheet universal trays, two A4 trays holding up to 1,500 sheets and a 100-sheet by-pass. This can be increased up to 8,100 sheets with the addition of a large-capacity tray for 4,000 sheets. The **optional finisher unit** supports a variety of automatic stapling positions, two-or four-hole punching and the creation of booklets with saddle stapling and 200 g/m2 covers. Documents printed by network users can be collected and sorted in a practical five-tray mailbox. **Professional document management** is guaranteed by a pneumatic paper feed system for rapid production and alignment precision.
