MULTIFUNCTIONAL DIGITAL SYSTEMS

UNBEATABLE RELIABILITY AND PRODUCTIVITY

A3 multifunctional digital systems
for daily workloads
in medium-large organisations.

MAIN CHARACTERISTICS

STANDARD COPIER, PRINTER AND NETWORK SCANNER AND OPTIONAL FAX	FULL RANGE OF PROFESSIONAL FINISHING OPTIONS
POWERFUL 600 MHz CPU FOR HIGH-SPEED DATA PROCESSING	50 opm SCAN SPEED
COLOUR SCANNER, WITH SINGLE PASS FRONT/BACK ACQUISITION	LONG-LIFE COMPONENTS FOR OUTSTANDING RELIABILITY
40 GB HARD DISK AND 512 MB RAM	OPTIONAL DATA SECURITY KIT FOR SECURITY AND CONFIDENTIALITY

PRODUCTIVITY

The Olivetti d-Copia 300MF, d-Copia 400MF and d-Copia 500MF, a family of black and white multifunctional copiers built on a copier engine, **offer standard printing and network scanning functions**, as well as an optional network fax function. Equipped with a **40 GB hard disk and standard 512 MB RAM** (expandable to 1 GB), the models deliver print and **copy speeds respectively of 30, 40, 50 ppm** in A4 format. The scan speed of 50 opm – the same on all three models – keeps waiting time to a minimum. All this plus outstanding reliability, thanks to long-life components, guarantees unbeatably high productivity.

EASY TO USE

All three models are based on a simple design philosophy: technology offers the best value if, in addition to being innovative, it is user friendly. This is translated into a series of improved facilities to keep things easy. First of all, the broad **intuitive colour display (8 inches)** with touch-sensitive buttons provides simple and immediate user guidance for the more complex functions. Documents stored on the hard disk can be previewed on the display, for easier selection and management (for instance: printing, transmission and filing). The Colour Thumbnail function can be used to run a quick check on documents before they are printed and copied, to help reduce waste.

User-friendly **COLOUR TOUCH PANEL**

EASY ACCESSIBLE USB PORT for direct print from a memory stick

Double-sided **COLOUR SCANNING**

DATA SECURITY

Data on the hard disk of multifunctional systems can be read by any network user. Confidentiality is ensured with the optional **Data Security Kit**, which automatically saves data in an encrypted form, and then cancels when the user finishes the task.

For added protection, passwords can be assigned to PDF files.

SIMPLE MULTITASKING

The innovative system architecture supports multi-tasking. For example, users can print while they scan, or send a fax while making a copy. This has obvious benefits for device management and sharing, and also speeds up workflows.

CONFIGURATION FLEXIBILITY

The Olivetti d-Copia 300MF, d-Copia 400MF and d-Copia 500MF are **modular devices** that can be configured to suit the needs of individual corporate users. The basic model comes with two 500-sheet paper trays, a 200-sheet manual feed and a standard duplex unit for front/back printing and copying. This already advanced standard **configuration can be extended with optional trays and finishing units** for all departmental workflows.

PAPER HANDLING

Base version

Two 500-sheet paper cassettes and 200-sheet multi-purpose tray

Extended base version Cabinet

(CP-300MF)

Flexibility

Two additional 500-sheet paper cassettes

(PF-700)

Maximum capacity

Additional 3000-sheet paper feeder

(PF-750)

FINISHING UNITS

Basic

500-sheet internal staple finisher

(DF-720)

Professional

Up to 1000 sheets

(DF-730)

Advanced

Up to 3000 sheets with stapling, hole-punch and booklet unit
